Chief Technology Officer

JOBS TO BE DONE

PROFESSIONAL

- **Reliable technology:** I need to ensure our systems and platforms scale seamlessly as we grow, so customers and teams never experience slowdowns.
- **Enable innovation and competitive advantage:** I need to leverage emerging technologies, especially AI, to improve our products, create new capabilities, and stay ahead of competitors.
- **Protect the company from technical risk:** I need to protect our systems, data, and customer information from outages, breaches, and compliance failures.
- **Align technology with business strategy:** I need to make sure engineering and product efforts are directly enabling revenue growth, operational efficiency, and strategic business goals.

PERSONAL

- **Innovation leader:** I want to be seen as someone who enables business growth and offers innovative strategies to accomplish that growth. I want my team to lead AI adoption and innovation for the company.
- **Peace of mind:** I want peace of mind knowing our systems won't fail during peak traffic or critical launches.

VALUE

One Sentence Pitch

Companies like Nike, ASOS, and eBay use Forter to prevent fraud, so they can focus on innovation and grow without risk. Forter helps you dominate today's automated attacks and tomorrow's AI shoppers—protecting agentic experiences across every platform and protocol.

HIGH PRESSURE INDICATORS

What to look for in an opportunity that may indicate an urgency to change?

OPERATIONS

- Increasing engineering headcount to support fraud or abuse mitigation
- Increasing engineering headcount to manage payment connections or rules.

TECH / TIMING

- Evaluating agentic commerce flows
- Expanding to a new region or vertical
- Planning a platform migration (e.g., Shopify/Salesforce): If a merchant is already planning platform migrations, creating ideal implementation timing without additional disruption.

IMPACT: WHY ACT NOW?

The Case for Immediate Action

AGENTIC COMMERCE	With the rise of agentic shopping, technical teams are urgently in need of understanding how to connect to and support experiences from these AI platforms. The gap between legacy systems and AI-native competitors is widening and any delays could result in a permanent loss of market share.
AI RISK AND OPPORTUNITY	AI is introducing new risks to the business that may introduce new security risks. At the same time, it's introducing new opportunities to increase efficiency and decrease manual costs.
PLATFORM MIGRATIONEXPERIENCES	The team is replacing legacy platforms with a newer system (e.g., Shopify/Salesforce), and rethinking how their different payment tools integrate and work together.
